ICF-C50L

SERVICE MANUAL

AEP Model

SPECIFICATIONS

Time display   24 hour

Frequency range:

FM	87.5 – 108.0 MHz
MW	530 – 1605 kHz
LW	153 – 255 kHz

Speaker: Approx. 6.6 cm (2 $^5/_8$ inches) dia. 8 ohms.
Power output:
    100mW (at 10% harmonic distortion)
Power requirements:
    220 V – 230 V AC, 50 Hz
Dimensions: Approx. 133 x 91 x 140 mm
    (5 ¼ x 3 ½ x 5 ½ inches) (w/h/d) incl.
    projecting parts and controls
Mass: Approx. 675g (1 lb 8 oz)

Design and specifications subject to change
without notice.

FEATURES

• Radio Controlled Clock Auto Adjust System
• Dual alarm
• Sleep Function

SAFETY-RELATED COMPONENT WARNING!!

COMPONENTS IDENTIFIED BY MARK ⚠ OR DOTTED
LINE WITH MARK ⚠ ON THE SCHEMATIC DIAGRAMS
AND IN THE PARTS LIST ARE CRITICAL TO SAFE
OPERATION. REPLACE THESE COMPONENTS WITH
SONY PARTS WHOSE PART NUMBERS APPEAR AS

SECTION 1
SERVICING NOTES

TABLE OF CONTENTS

1-1. CHECK MODE OF LIQUID CRYSTAL DISPLAY PANEL

How to enter the check mode:
Press the $\boxed{\text{RADIO OFF}}$ + $\boxed{\text{CLOCK}}$ +
$\boxed{\text{D.S.T. SUMMER T}}$ keys simultaneously for more than 5 seconds, and the check mode is activated.
When the check mode becomes active, all LCD are tuned on, and each time a key is pressed, the display changes so that the LCD can be checked.

How to release the check mode:
Press the $\boxed{\text{RADIO OFF}}$ key, and the normal mode is restored.

1-2. RESET OF SOFTWARE

Press the $\boxed{\text{CLOCK AUTO ADJUST}}$ + $\boxed{\text{CLOCK}}$ +
$\boxed{\text{D.S.T. SUMMER T}}$ keys simultaneously for more than 5 seconds, and the RAM is cleared and the software is initialized.

1-3. HOW TO CHANGE THE CERAMIC FILTERS

This model is used two ceramic filters of CF2, CF3.
You must use same type of color marked ceramic filters in order to meet same specifications.
Therefore, the ceramic filter must change two pieces together since it's supply two pieces in one package as a spare parts.

Mark	Center frequency
red	10.70MHz
blue	10.67MHz
orange	10.73MHz
black	10.64MHz
white	10.76MHz

Setting the Clock and Date

Setting the Clock Automatically

This radio has Radio Controlled Clock Auto Adjust System that adjusts to the current time. The Radio Controlled Clock Auto Adjust System receives the clock data (Year, month, date, hour, minute, second and D.S.T.) on a certain radio wave and radio controls the clock time. Be sure to set the radio where reception would be easier.

1. Set the radio.
   Choose a place where there is good reception as possible.
2. Plug in the unit.
   The Clock Auto Adjust function will automatically operate and " 📶 " will flash in the display.

Flashes   Place the unit where "1" will appear.
Counting starts when the number at the upper righthand corner of the display (for the first time) changes to 1.

3. When the clock auto adjust has been completed, the clock will start to operate and " 📶 " will appear in the display.

   United Kingdom: 12 hour display;
   AM 12:00 = midnight
   Other Countries: 24 hour display;
   0:00 = midnight

Lights up
To stop Clock Auto Adjust during operation
Press CLOCK AUTO ADJUST.

What is Clock Auto Adjust System?

The clock data that is sent has total of 60 units (this total unit is called 1 frame), the data is sent 1 unit for every second. This radio receives this data one by one from data No. 1 to data No. 60. When the radio receives the first frame and then starts to receive the second frame for confirmation. When the 2nd frame has been confirmed, then the clock time data reception has been completed. When the unit is plugged in, this function will operate until the time receives completely.

The Display during Clock Auto Adjust Mode
Ⓐ Reception indicator	Will flash during Clock Auto Adjust mode. Will appear when Clock Auto Adjust mode is completed.
Ⓑ Reception indicator (frame data)	1: 1 frame data when received 0: 1 frame data when not received
Ⓒ Reception indicator (unit data)	1: 1 unit data when received 0: 1 unit data when not received
Ⓓ Duration of Clock Auto Adjust mode	Maximum 10 hours displayed, even though the Clock Auto Adjust mode is not completed after 10 hours, the operation is still continued.

When the LCD display is difficult to see.
Change the Bright switch to either H (High) or L (Low) for better display.

About Radio Reception
The radio controlled signal is transmitted from the areas shown below.

England: Teddington, Middlesex
          52° 22' N, 01° 11' W
Germany: Mainflingen
          50° 0.1' N, 09° 00' E

- The U.K. models will receive the radio signal from England. The current time of England will be displayed.
- The other models will receive the radio signal from Germany. The current time of Germany will be displayed.
- There may be areas where radio reception is weak.

Once the Clock Auto Adjust has been completed
If the reception has not changed, you do not have to set the clock again.
The Clock Auto Adjust function will automatically operate everynight at AM 3:05 to keep the correct time. If the reception is incomplete after 12 minutes, the time setting will return to the original time and " 📶 " will disappear from the display.

If you want to Restart the Clock Auto Adjust
Press CLOCK AUTO ADJUST.
While the Clock is operating, " 📶 " will start to flash indicating that the Clock Auto Adjust function is operating. If the reception has been completed " 📶 " will be displayed and the clock time will change to the current time. If the reception is incomplete after 12 minutes, the time setting will return to the original time and " 📶 " will disappear from the display.

About Daylight Saving Time (summer time) indication
The changing of the summer time will be automatically changed by Clock Auto Adjust function. The change of summer time will have a time lag.
Winter Time → Summer Time: about 1 hour and 10 minutes time lag.
Summer Time → Winter Time: about 10 minutes time lag.
During the Summer Time mode " ☼ " will appear in the display.

To Change the Display to the Daylight Saving Time (summer time) Indication
Press D.S.T.•SUMMER T.
" ☼ " will appear and the time indication changes to the summer time.
To cancel the summer time indication, press D.S.T.•SUMMER T. button again.

Manual Setting the Clock

1. Press CLOCK for more than 1 second.
   The "Year" will start to flash in the display.
2. Press TIME SET + or – until the correct number appears in the display.
3. Press CLOCK once.
   The next category will flash in the display.
4. Repeat steps 2 and 3 to set the month, date, hour, minute.
   After setting the minute, press and release CLOCK to start the counting of the seconds.

Note
- If you stop during the clock setting , after about a minute the previous display will return.
- To set the current time exactly to the second, release the CLOCK with the radio or telephone time signal at step 4 (above).

Operating the Radio

1. Press RADIO ON.
2. Select BAND (FM or AM for ICF-C50, FM,MW or LW for ICF-C50L)
3. Tune in to a station using TUNING.
4. Adjust VOLUME.

- To turn off the radio, press RADIO OFF.

To Improve Radio Reception
FM: Extend the FM wire antenna to improve FM reception.
AM(MW)/LW: Rotate the unit horizontally for optimum reception. A ferrite bar antenna is built into the unit.

Setting the Alarm

You can set the radio alarm to **ALARM A**, and buzzer alarm to **ALARM B**.
To set the radio alarm, first tune in a station as described in "Operating the Radio" and adjust the volume.

1. Turn off the radio.
2. While holding down **ALARM A** or **B**, press **TIME SET +** or – until the desired time appears in the display.
   When you release **ALARM A** or **B**, the alarm setting is completed.

The radio or buzzer will automatically sound at the preset time, and automatically turn itself off after 60 minutes.

- To turn off the alarm manually, press **ALARM RESET/OFF**. The alarm will come on at the preset time on the next day.
- To cancel the alarm before the alarm time, while holding down **ALARM A** or **B**, press **ALARM RESET/OFF**.
- To check the preset time, press **ALARM A** or **B**.

Notes
- The buzzer sound level is fixed, and independent of the **VOLUME** control.
- If you set **ALARM A** and **ALARM B** to the same desired time, only **ALARM A** will work.
- Even if you are listening to the radio, you can set the radio or buzzer alarm.
- The alarm settings has a backup for about 10 minutes, when there is a service interruption for more than 10 minutes, the alarm setting memorys will be cancelled.

To Doze a Few More Minutes
1. Press **SNOOZE/SLEEP OFF**.
   The radio or buzzer will shut off but will automatically come on again after about 8 minutes. You can repeat this process as many times as you like.

- You can reset the alarm time while activating the snooze function.

To Use Both Sleep Timer and Alarm Function
You can fall asleep to the radio sound and you will be awakened by the radio or buzzer alarm at the preset time.

1. Set the alarm. (See "Setting the Alarm".)
2. Set the sleep timer. (See "Setting the Sleep Timer".)

Setting the Sleep Timer

By setting the sleep timer, you can fall asleep to the radio sound. The radio turns off after the selected time.

1. Press **SLEEP** repeatedly until the desired operating time is displayed.
   Each time you press **SLEEP**, the sleep timer indication changes as follows.

   On → 90 → 60 → 30
   └─ OFF ← 15 ←┘

   After setting the Sleep Timer, the current time will appear.

- To turn off the sleep timer before the selected time has elapsed, press **SNOOZE/SLEEP OFF**.

Precautions

On Installation
- Try near a window or place the radio where the reception is better.
- Do not place the unit where the reception would become weak (as follows).
  — near a T.V., refrigerator, computer, etc.
  — on a steel table, steel shelf, and other steel objects.

- Operate the unit on the power sources specified in "Specifications".
- The nameplate indicating operating voltage, etc. is located on the bottom exterior.
- To disconnect the power cord, pull it out by the plug, not the cord.
- Do not place the unit on surfaces (rugs, blankets, etc.) or near materials (curtains, draperies) that block the ventilation holes.
- Should anything fall into the unit, unplug the unit and have it checked by qualified personnel before operating it further.
- The unit is not disconnected from the AC power source (mains) as long as it is connected to the wall outlet, even if the unit itself is turned off.

If you have any questions or problems concerning your unit, please consult your nearest Sony dealer.

NOTE:

- Due to standardization, replacements in the parts list may be different from the parts specified in the diagrams or the components used on the set.
- -XX and -X mean standardized parts, so they may have some difference from the original one.
- RESISTORS
  All resistors are in ohms.
  METAL:Metal-film resistor.
  METAL OXIDE: Metal oxide-film resistor.
  F:nonflammable

- Items marked "*" are not stocked since they are seldom required for routine service. Some delay should be anticipated when ordering these items.
- SEMICONDUCTORS
  In each case, u:μ, for example:
  uA .. : μA..   uPA.. : μPA..
  uPB.. : μPB.. uPC.. : μPC..   uPD.. : μPD..
- CAPACITORS
  uF: μF
- COILS
  uH: μH

The components identified by mark ⚠ or dotted line with mark ⚠ are critical for safety. Replace only with part number specified.

When indicating parts by reference number, please include the board.

SERVICE MANUAL

SUPPLEMENT-1

File this supplement with the service manual.

Subject: Antenna Adjustment (L51)

(ENG-97003)

[ANTENNA ADJUSTMENT]

Setting:

[CLOCK BOARD]

IC51

AF oscillator Put the lead-wire antenna close to the set.

L51

level meter

*10PF

C59

+

−

Carrier frequency : 77.5kHz
Modulation : OFF

*Capacitor must be connect very near with clock board.

Procedure :
1. To adjust L51 coil for level meter's output to be maximum.
2. To confirm tracking condition by tracking bar.
   (* If you do not have tracking bar, you can omit this process.)
3. Fix L51 by wax.
   (Re-melt wax by solder iron)
