SPECIFICATIONS

Circuit system	FM: Superheterodyne SW/MW/LW: Dual conversion superheterodyne															
Frequency range	<table border="1"> <thead> <tr> <th>Band</th> <th>Saudi Arabia model</th> <th>Other models</th> </tr> </thead> <tbody> <tr> <td>FM</td> <td>87.5 - 108.0 MHz</td> <td>76.0 - 108.0 MHz</td> </tr> <tr> <td>SW</td> <td>1621 - 26100 kHz</td> <td>1621 - 29999 kHz</td> </tr> <tr> <td>MW</td> <td>530 - 1620 kHz</td> <td>530 - 1620 kHz</td> </tr> <tr> <td>LW</td> <td>150 - 285 kHz</td> <td>150 - 529 kHz</td> </tr> </tbody> </table>	Band	Saudi Arabia model	Other models	FM	87.5 - 108.0 MHz	76.0 - 108.0 MHz	SW	1621 - 26100 kHz	1621 - 29999 kHz	MW	530 - 1620 kHz	530 - 1620 kHz	LW	150 - 285 kHz	150 - 529 kHz
Band	Saudi Arabia model	Other models														
FM	87.5 - 108.0 MHz	76.0 - 108.0 MHz														
SW	1621 - 26100 kHz	1621 - 29999 kHz														
MW	530 - 1620 kHz	530 - 1620 kHz														
LW	150 - 285 kHz	150 - 529 kHz														
Speaker	Approx. 77 mm (3 1/8 inches) dia., 8 ohms															
Power output	400 mW (at 10 % harmonic distortion)															
Outputs	Recording output jack (stereo minijack) output level 245 mV (-10 dBs) output impedance 10 kilohm or less															
Power requirements	Headphones jack (stereo minijack) 16 ohms 6 V DC Four R6 (size AA) batteries DC IN 6V jack accepts: Sony AC-E601 AC power adaptor (supplied for Tourist model only)															
Battery life	Using Sony SUM-3(NS) batteries: FM: approx. 15 hours, AM: approx. 10 hours Using Sony AM-3(N) alkaline batteries: FM: approx. 33 hours, AM: approx. 20 hours															
Dimensions	(When listening for four hours a day at normal volume) Approx. 191.2 x 118 x 32.3 mm (w/h/d) (7 5/8 x 4 3/4 x 1 5/16 inches) including projecting parts and controls															
Mass	Approx. 615 g (1 lb. 5.7 oz) including batteries															
Accessories supplied	Batteries (4) * 1 Stereo headphones (1) * 1 Ear pad (2) * 1 AC power adaptor AC-E601 (1) * 1 AC plug adaptor (1) * 1 Compact antenna (1) Antenna connector (1) * 1 Carrying case (1) Wave handbook (1) * 2 How to catch the wave (1) * 1 * 1 supplied for the Tourist model only * 2 not supplied for the Saudi Arabia model only															

Design and specifications subject to change without notice.

FEATURES

- An FM stereo/SW/MW/LW receiver with worldwide band coverage.
 - Quartz controlled PLL (Phase Locked Loop) synthesizer system using a microcomputer for easy pinpoint tuning. The tuned frequency is digitally displayed.
 - SSB (Single Side Band) can be received (except for the Saudi Arabia model only).
 - FM stereo reception for headphones (supplied for the Tourist model only).
- | | |
|---------------|---|
| Direct tuning | Tuning in the station by inputting the frequency of the station directly |
| Manual tuning | Even if you don't know the frequency of the station, you can tune in the station precisely. |
| Scan tuning | Automatic searching of a station |
| Preset tuning | Up to 20 stations, 10 stations each for FM and AM, can be preset for button-touch tuning. |
| Timer standby | Receiving a desired station at the desired time |
| Sleep timer | Turning the radio off automatically in 60 minutes |
| Power sources | Three different power sources: internal batteries, house current, car batteries |

FM STEREO/SW/MW/LW
PLL SYNTHESIZED RECEIVER

SERVICING NOTE

How to turn the power ON/OFF

1. Short the pattern by solder bridge as shown below. (S201 (Power Lock) switch is turn ON.)
2. Push the S226 (ON/OFF) switch.

SAFETY-RELATED COMPONENT WARNING!!

COMPONENTS IDENTIFIED BY MARK  OR DOTTED LINE WITH MARK  ON THE SCHEMATIC DIAGRAMS AND IN THE PARTS LIST ARE CRITICAL TO SAFE OPERATION. REPLACE THESE COMPONENTS WITH SONY PARTS WHOSE PART NUMBERS APPEAR AS SHOWN IN THIS MANUAL OR IN SUPPLEMENTS PUBLISHED BY SONY.

ATTENTION AU COMPOSANT AYANT RAPPORT À LA SÉCURITÉ!

LES COMPOSANTS IDENTIFIÉS PAR UNE MARQUE  SUR LES DIAGRAMMES SCHÉMATIQUES ET LA LISTE DES PIÈCES SONT CRITIQUES POUR LA SÉCURITÉ DE FONCTIONNEMENT. NE REMPLACER CES COMPOSANTS QUE PAR DES PIÈCES SONY DONT LES NUMÉROS SONT DONNÉS DANS CE MANUEL OU DANS LES SUPPLÉMENTS PUBLIÉS PAR SONY.

SECTION 1 GENERAL

This section is extracted from instruction manual.

Location and Function of Controls

Front

- 1** Telescopic antenna
- 2** EXT ANT jack
- 3** SENS DX/LOCAL (FM/AM sensitivity) selector
- 4** LINE OUT (recording output) jack
- 5** (headphones) jack
When the stereo headphones (supplied for the Tourist model only) are plugged in, no sound comes from the speaker. You can listen to FM stereo.
- 6** DC IN 6V (external power input) jack
- 7** Display
- 8** LIGHT button
Press this button to illuminate the display window for about 15 seconds.
- 9** Control panel
- 10** Speaker

Rear

- 11** SSB FINE TUNE control (Except for the Saudi Arabia model only)
- 12** LSB/USB selector
- 13** AM MODE selector
- 14** TONE selector
- 15** VOLUME control
- 16** Stand

- 17** RESET button
Press this button with a pointed object when the unit functions incorrectly. When this button is pressed, the preset stations and the clock settings are erased.
- 18** MW CH STEP (MW channel step) 9/10 kHz selector
- 19** Battery compartment

Location and Function of Controls

Control panel

- 1 **SLEEP button**
- 2 **FM/AM button**
- 3 **STANDBY MEMORY/TIMER STANDBY/STANDBY TIME SET [a]/[b] buttons**
- 4 **ENTER/TIME SET button**
- 5 **KEY PROTECT  button**
- 6 **POWER/LOCK (main power) switch**
Set this switch to POWER, then press the ON/OFF button to turn on the radio. Set the switch to LOCK when carrying the radio. When this switch is set to LOCK, the power will not be turned on even if you press the ON/OFF button.
- 7 **ON/OFF (power) button**
- 8 **MEMORY PRESET/DIRECT TUNE 0 - 9 buttons**
- 9 **EXE (execute) button**
- 10 **DIRECT button**
- 11 **MANUAL TUNE/SCAN START/STANDBY TIME SET/TIME SET buttons**
- 12 **SCAN STOP/AM BAND button**

Display

- 1 **TUNE indicator**
Lights when a station is tuned in.
- 2 **STANDBY [a]/[b] indicators**
Appears when the standby timer [a]/[b] is set.
- 3 **Key protect indicator**
While this indicator appears, all the functions of the buttons are locked.
- 4 **Battery empty indicator**
- 5 **SYNC LOCK indicator**
Lights when the synchronous detection is performed.
- 6 **SLEEP indicator**
Appears when the sleep timer is operating.
- 7 **Preset display**
- 8 **Time/frequency display**

Setting the Clock

- 1 Set POWER/LOCK to POWER.**
When you first install batteries or the clock is reset, "0:00" flashes in the display. Press TIME SET.
- 2 While holding down TIME SET, press a MANUAL TUNE/SCAN START/STANDBY TIME SET/TIME SET button to adjust the clock.**
Every pressing of an inner MANUAL TUNE/SCAN START/STANDBY TIME SET/TIME SET button (⇄ or ⇄) changes the time setting by one minute, and an outer button (⇄ or ⇄) by one hour. To advance the time digits rapidly, keep it pressed.

- 3 Release TIME SET.**
The ":" indication starts flashing, and the clock begins to operate.

While listening to the radio
You cannot set the clock while you are listening to the radio. Be sure to press ON/OFF to turn the radio off and then set the clock.

The display when POWER/LOCK is LOCK
The current time is displayed.

Changing the MW Channel Step

The MW channel step is factory-set to 10 (9) kHz to match the frequency allocation system of the country. If you use the radio where the frequency allocation system is based on 9 (10) kHz interval, set the MW CH STEP 9/10 kHz selector in the battery compartment to 9 (10) kHz.

- 1 Set POWER/LOCK to LOCK.**
- 2 Open the battery compartment and remove the batteries.**
- 3 Change MW CH STEP 9/10 kHz.**
- 4 Install the batteries and close the battery compartment.**
- 5 Set POWER/LOCK to POWER.**

The frequency allocation of the area

Area	Frequency allocation system
North America, South America	10 kHz step
Other countries	9 kHz step

Change the MW CH STEP 9/10 kHz within 10 minutes
If more than 10 minutes have passed after the batteries were removed, the current time will be erased. In this case, set the time again.

Direct Tuning

Examples

FM 89.5 MHz

AM 810 kHz

AM 10000 kHz

AM 12095 kHz

1 Set POWER/LOCK to POWER.

2 Press ON/OFF. The radio is turned on.

3 Press FM/AM to select the band (FM or AM).

Select AM to receive SW, MW or LW.

4 Press DIRECT. The frequency in the display is erased.

Note

After pressing a button, press the next button within 10 seconds. If you do not, the display will return to the previously received station.

When you input a frequency outside the frequency range

The display will return to the previously received station. Press DIRECT and enter the correct frequency again.

If you input a wrong frequency

Press DIRECT to cancel the entry, and perform the above procedure from step 4 with the correct frequency.

14

5 Enter the frequency of the desired station directly by pressing the MEMORY PRESET/DIRECT TUNE buttons 0 - 9. You should press a button within 10 seconds after pressing the previous button.

Minimum entry digit:

FM: 0.05 MHz (50 kHz)

AM: 1 kHz

For FM band, a decimal point is not required.

For AM band, lower triple zero digits can be omitted.

(See the examples at left.)

6 Press EXE. When the station is tuned in, the TUNE indicator lights.

7 Adjust VOLUME.

To turn off the radio, press ON/OFF.

To Improve Reception

For MW/LW reception

Retract the telescopic antenna. The built-in ferrite bar antenna activates. Since this antenna is directional, rotate the unit horizontally to the optimum direction.

For SW reception

Pull out the telescopic antenna to its full length and set it vertically.

For FM reception

Pull out the telescopic antenna to expose its swivel base and adjust its length, angle and direction.

When the sound is distorted

Normally set SENS DX/LOCAL to DX. However, when the sound is distorted, set it to LOCAL.

When you are listening to the news

Set TONE to NEWS. Vocal will be heard more clearly. When you are listening to music, set it to MUSIC.

To Prevent Accidental Change of the Received Station

Press KEY PROTECT . The mark appears in the display window and all the buttons on the control panel do not work.

To release the key protect function, press KEY PROTECT again.

15

Manual Tuning

- 1 Set **POWER/LOCK** to **POWER**.
- 2 Press **ON/OFF**. The radio is turned on.
- 3 Press **FM/AM** to select the band (FM or AM).
Select AM to receive SW, MW or LW.
- 4 If you select the FM band, skip this step.
While pressing the SCAN STOP/AM BAND, press an outer MANUAL TUNE/SCAN START/STANDBY TIME SET/TIME SET button (↔ or ⇨) repeatedly to select the desired band or meter band.

The minimum frequency in that band or meter band is received.

What is a meter band?
SW is divided into 13 bands by the wave length (meter). Each band is called a meter band. (See the table on page 19.)

Frequency band does not change
If you keep pressing **MANUAL TUNE/SCAN START/STANDBY TIME SET/TIME SET**, the frequency will repeat in the following ranges.

Band	Inner buttons (⇨ or ⇩)	Outer buttons* (↔ or ⇨)
FM	76 ↔ 108 MHz	76 ↔ 108 MHz
AM	150 ↔ 29999 kHz	in each broadcast band or meter band

* Scan tuning mode

- 5 Press an **MANUAL TUNE/SCAN START/STANDBY TIME SET/TIME SET button** to search for a desired station. Pressing the outer (↔ or ⇨) or inner (⇨ or ⇩) buttons changes the frequency in the following frequency step.

Band	Outer buttons (↔ or ⇨)	Inner buttons (⇨ or ⇩)
FM	50 kHz	50 kHz
SW	5 kHz	1 kHz
MW	9/10 kHz	1 kHz
LW	9 kHz	1 kHz

When the station is tuned in, the **TUNE** indicator lights.

- 6 **Adjust VOLUME.**
To turn off the radio, press **ON/OFF**.

Scan Tuning

- 1 Set POWER/LOCK to POWER.**
- 2 Press ON/OFF.** The radio is turned on.
- 3 Receive a broadcast band** by way of direct tuning or manual tuning. (Refer to the table on the next page for the frequency range of each broadcast band.)
- 4 Keep pressing an outer MANUAL TUNE/SCAN START/STANDBY TIME SET/TIME SET button (⇐ or ⇒) for about 2 seconds.** Scan tuning will begin within the frequency range. When a station is received, the scanning will stop automatically for about 2 seconds and the TUNE indicator lights.
- 5 Press SCAN STOP/AM BAND** to listen to the station being received. The scan tuning stops and the station being received is tuned in.
- 6 Tune in the station more precisely by inner buttons of MANUAL TUNE/SCAN START/STANDBY TIME SET/TIME SET (⇐ or ⇒), if required.**
- 7 Adjust VOLUME.**
To turn off the radio, press ON/OFF.

Frequency Range of the Auto Scan for Each Broadcast Band

Broadcast band	Frequency range	SW meter band	
AM	LW	153 kHz – 522 kHz * 1	—
	MW	530 kHz – 1620 kHz (10 kHz step)	—
		531 kHz – 1620 kHz (9 kHz step)	—
	SW	2250 kHz – 2550 kHz	120 meter band
		3150 kHz – 3450 kHz	90 meter band
		3850 kHz – 4050 kHz	75 meter band
		4700 kHz – 5100 kHz	60 meter band
		5900 kHz – 6250 kHz	49 meter band
		7100 kHz – 7400 kHz	41 meter band
		9400 kHz – 10000 kHz	31 meter band
		11500 kHz – 12150 kHz	25 meter band
		13500 kHz – 13900 kHz	22 meter band
		15000 kHz – 15700 kHz	19 meter band
	17450 kHz – 18000 kHz	16 meter band	
21450 kHz – 21950 kHz	13 meter band		
25600 kHz – 26100 kHz	11 meter band		
FM	76.00 MHz – 108.00MHz*2	—	

* 1 153–279kHz for the Saudi Arabia model

* 2 87.50–108.00MHz for the Saudi Arabia model

The frequency allocation (channel step)

FM	50 kHz
SW	5 kHz
MW	9 kHz/10 kHz
LW	9 kHz

When scan tuning stops too often
Set SENS DX/LOCAL to LOCAL.

Frequency band does not change
If you do not stop scanning, the scanning will repeat in the range of the broadcast band or meter band.

Preset Tuning

Presetting a Station

- 1 Set **POWER/LOCK** to **POWER**.
- 2 Press **ON/OFF**. The radio is turned on.
- 3 Tune in a desired station by way of direct tuning (see page 14), manual tuning (see page 16) or scan tuning (see page 18).
- 4 While keeping **ENTER** pressed, press one of the **MEMORY PRESET/DIRECT TUNE** buttons 0 to 9.

The station which is tuned in is preset on that button. The preset number appears in the display.

Ex. To preset FM 89.0 MHz on MEMORY PRESET/DIRECT TUNE 1

The number of stations you can preset
Up to 20 stations, 10 stations each for FM and AM, can be preset to MEMORY PRESET/DIRECT TUNE button 0 to 9.

To change the preset station
Preset a station to the desired MEMORY PRESET/DIRECT TUNE button 0 to 9. The station previously preset to the button is erased.

Tuning in a Preset Station

- 1 Set **POWER/LOCK** to **POWER**.
- 2 Press **ON/OFF**. The radio is turned on.
- 3 Press **FM/AM** to select the band (FM or AM).
- 4 Press the desired **MEMORY PRESET/DIRECT TUNE** button 0 to 9.
- 5 **Adjust VOLUME**.

The station preset on that button will be tuned in.

To turn off the radio, press **ON/OFF**.

SECTION 2 DISASSEMBLY

Note : Follow the disassembly procedure in the numerical order given.

2-1. CABINET (REAR)

SECTION 3 ELECTRICAL ADJUSTMENTS

• AM Section

AM RF signal generator

30% amplitude modulation by 400Hz signal

Put the lead-wire antenna close to the set.

• FM Section

FM RF signal generator

22.5kHz frequency deviation by 400Hz signal
output level: as low as possible

(1) 1st IF Adjustment

Setting :

SENS switch : DX
TONE switch : MUSIC
AM MODE switch : NORM

Procedure :

1. Set the frequencies of the AM RF SSG and the frequency display of the set to AM 150kHz.
2. Adjust T104 and T105 so that the reading on the VTVM becomes in maximum.

Adjustment Location : main board

(2) 2nd Local Adjustment

Setting :

SENS switch : DX
TONE switch : MUSIC
AM MODE switch : NORM

Procedure :

1. Connect frequency counter as shown page 12.
2. Tune the set to AM 150kHz.
3. Adjust RV401 so that the reading on the frequency counter becomes in $55.39\text{MHz} \pm 30\text{Hz}$.

Adjustment Location : main board

- Repeat the procedures in each adjustment several times, and the frequency coverage and tracking adjustments should be finally done by the trimmer capacitors.

(3) SSB 0 Beat Adjustment

Setting :

SENS switch : DX
TONE switch : MUSIC
AM MODE switch : SYNC

Procedure :

- Short the jumper wire between the IC401 pin ⑥ and GND.
- Insert Headphones plug into Headphones jack.
- Tune the set to AM 150kHz.
- Set the SYNC/SSB switch to USB.
- Adjust CT401 so that the sound from headphones is minimized.
- Set the SYNC/SSB switch to LSB.
- Adjust CT401 so that the sound from headphones is minimized.
- Repeat the above steps 4 to 7 several times.
- After adjustment, release the jumper wire.

Adjustment Location : main board

(4) (AM)/FM VCO Adjustment

Setting :

SENS switch : DX
TONE switch : MUSIC
AM MODE switch : NORM

Procedure :

- Connect digital voltmeter as shown page 12.
- Tune the set to AM 150kHz.
- Confirm that the reading on the digital voltmeter becomes in more than 2.2V.
- Tune the set to AM 29999kHz.
- Confirm that the reading on the digital voltmeter becomes in less than 13V.
- Tune the set to FM 76.00MHz.
- Adjust T403 so that the reading on the digital voltmeter becomes in $2.0 \pm 0.05V$.
- Tune the set to FM 108.00MHz.
- Confirm that the reading on the digital voltmeter becomes in more than 11V.

Adjustment Location : main board

(5) FM Tracking Adjustment

Setting :

SENS switch : DX
TONE switch : MUSIC

Procedure :

- Set the frequencies of the FM RF SSG and the frequency display of the set to FM 104.00MHz.
- Adjust CT101 and CT102 so that the reading on the VTVM becomes in maximum.
- Set the frequencies of the FM RF SSG and the frequency display of the set to FM 80.00MHz.
- Adjust T101 and T102 so that the reading on the VTVM becomes in maximum.
- Repeat the above steps 1 to 4 several times.

Adjustment Location : main board

(6) Stereo (MPX) Adjustment

Setting :

SENS switch : DX
TONE switch : MUSIC

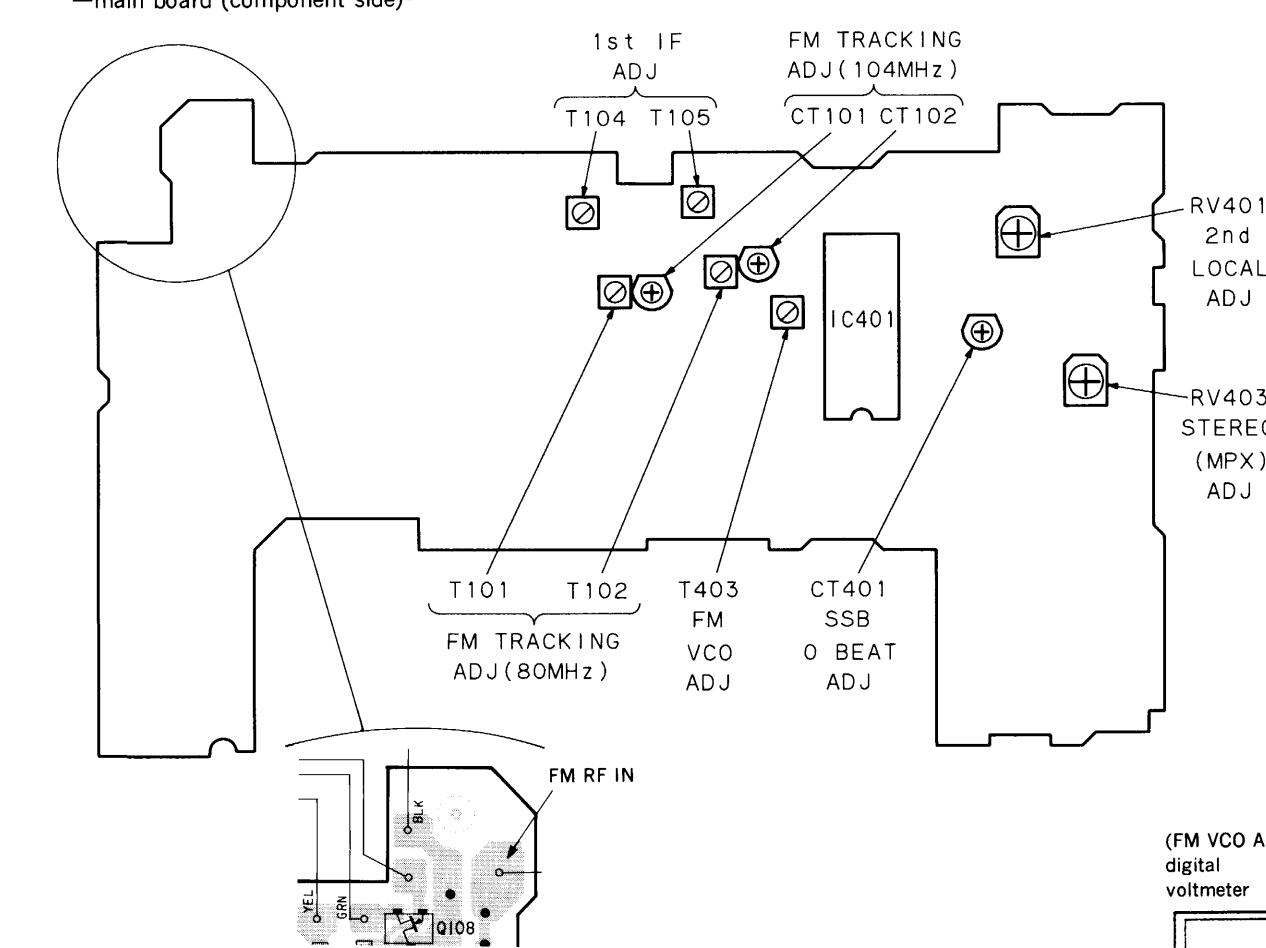

Procedure :

- Insert Headphones plug into Headphones jack.
- Connect a capacitor (10 μ F) between one side of C414 and GND.
- Connect frequency counter as shown page 12.
- Tune the set to FM 108.00MHz.
- Adjust RV403 so that the reading on the frequency counter becomes in $76kHz \pm 300Hz$.
- Remove the Headphones plug.

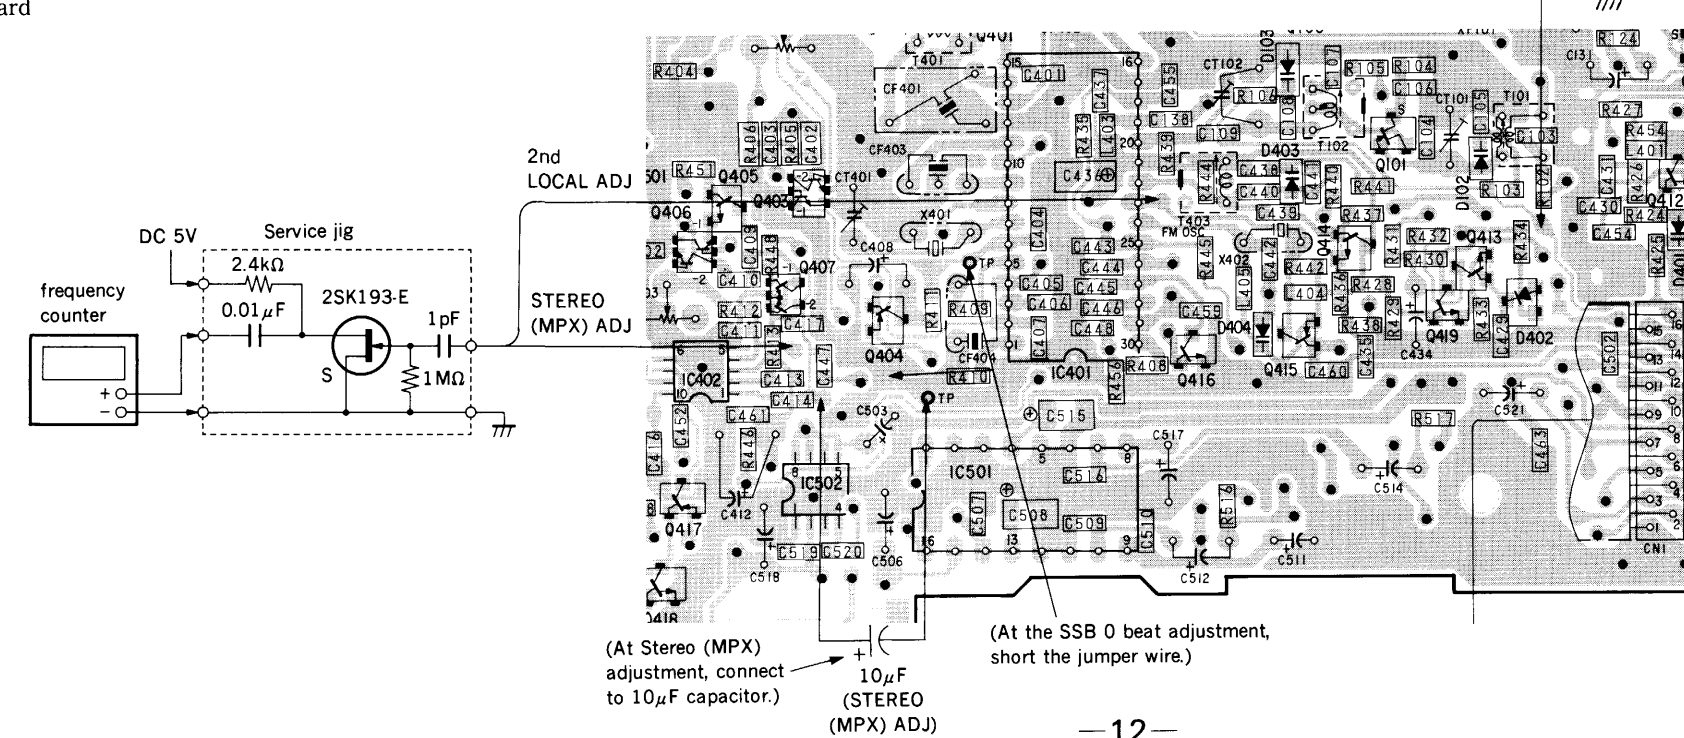

Adjustment Location : main board

Adjustment Location : main board

—main board (component side)—

—main board (conductor side)—

Note:

- — parts extracted from the component side.
- — Through hole.
- indicates side identified with part number.
- ▨ — Pattern on the side which is seen.
- ▩ — Pattern on the rear side.
- Abbreviation
- EA: Saudi Arabia model

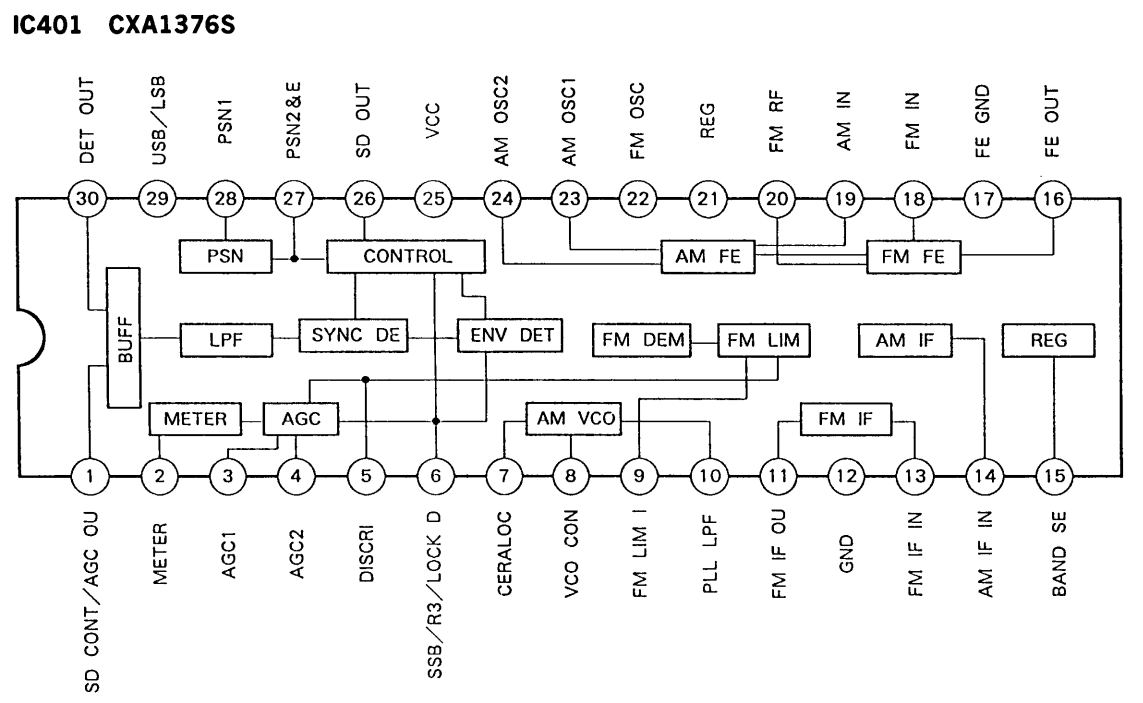

4-3. SCHEMATIC DIAGRAM • Refer to page 23 for IC Block Diagrams.

- Note:**
- All capacitors are in μF unless otherwise noted. pF : μpF 50WV or less are not indicated except for electrolytics and tantalums.
 - All resistors are in Ω and $1/4\text{ W}$ or less unless otherwise specified.
 - Δ : internal component.
 - \square : B+ Line
 - \square : adjustment for repair.
 - Power voltage is dc 6V and fed with regulated dc power supply from external power voltage jack.
 - Voltage is dc with respect to ground under no-signal (detuned) conditions.
 - no mark: FM
 - () : AM
 - < > : LW
 - [] : SW
 - Voltages are taken with a VOM (Input Impedance 10M Ω). Voltage variations may be noted due to normal production tolerances.
 - Signal path.
 - \Rightarrow : FM
 - Abbreviation
 - EA : Saudi Arabia model

**SECTION 6
ELECTRICAL PARTS LIST**

NOTE:

- Due to standardization, replacements in the parts list may be different from the parts specified in the diagrams or the components used on the set.
- -XX and -X mean standardized parts, so they may have some difference from the original one.
- RESISTORS
All resistors are in ohms.
METAL: Metal-film resistor.
METAL OXIDE: Metal oxide-film resistor.
F: nonflammable
- Abbreviations
IT : Italian model
EA : Saudi Arabia model
G : German model
JE : Tourist model

- Items marked "*" are not stocked since they are seldom required for routine service. Some delay should be anticipated when ordering these items.
- SEMICONDUCTORS
In each case, u: μ , for example:
uA.: μ A. uPA.: μ PA.
uPB.: μ PB. uPC.: μ PC. uPD.: μ PD.
- CAPACITORS
uF: μ F
- COILS
uH: μ H

When indicating parts by reference number, please include the board.

The components identified by mark Δ or dotted line with mark Δ are critical for safety. Replace only with part number specified.

Les composants identifiés par une marque Δ sont critiques pour la sécurité. Ne les remplacer que par une pièce portant le numéro spécifié.

SUPPLEMENT - 2

File this Supplement with the Service Manual.

Subject : CHINESE MODEL HAS BEEN ADDED

The Chinese model is approximately the same as the E model.
Only difference between Chinese model and E model are listed.
Refer to original Service Manual (9-959-655-11) and Supplement-1 (9-959-655-81) previously issued for the other information.

PRINTED WIRING BOARDS (Service Manual See page 16 , 17)
 (Location 8 - 12, A - H)

 : Difference portion

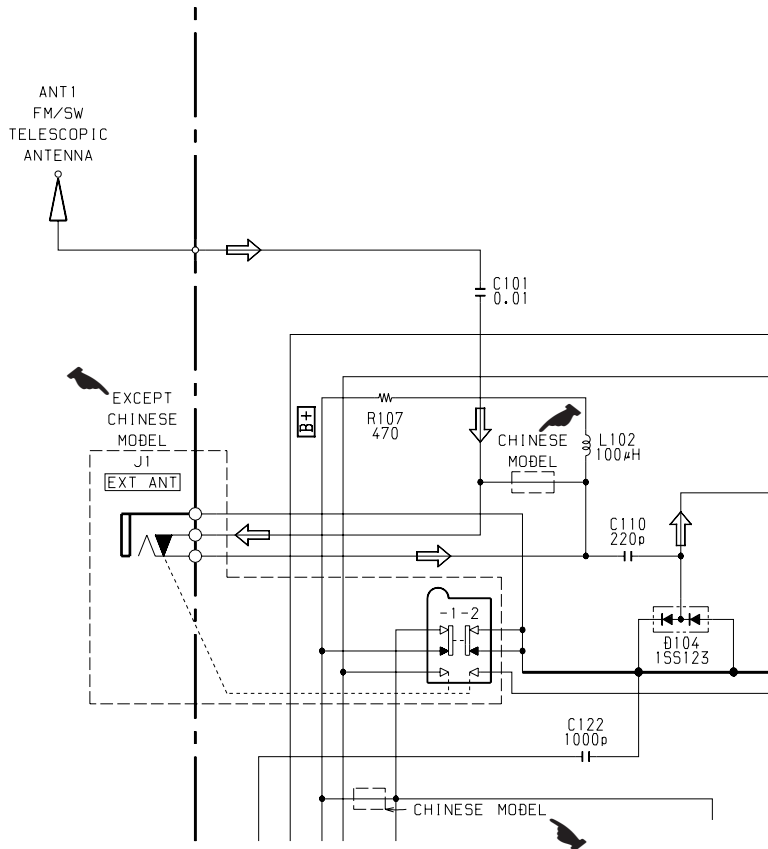

Note :

- The Chinese model comes already mounted with a J4 (DC IN 6V) jack but this is not usable. (Removing the jack would cut off the battery power.)
-  : Pattern on the side which is seen.
-  : Pattern of the rear side.
